

## Appendix 4: Additional tables for Section 4

### Contents

#### Expected longevity

- Table A4.1 Expected mortality by age and gender
- Table A4.2 Expected mortality by age and self reported health status
- Table A4.3 Expected mortality by age, gender and self reported health status
- Table A4.4 Expected mortality by age and partnership
- Table A4.5 Expected mortality by age and occupational class
- Table A4.6 Expected mortality by age and private pension status
- Table A4.7 Expected mortality by age and portfolio status
- Table A4.8 Expected mortality by age and portfolio status, has financial assets only
- Table A4.9 Expected mortality by age and portfolio status, has financial assets >10k only
- Table A4.10 Expected mortality by age and portfolio status, men
- Table A4.11 Expected mortality by age and portfolio status, women
- Table A4.12 Actual versus Expected mortality, by current age

#### Chances of insufficient resources

- Table A4.13 Chances of having insufficient resources by age and private pension status
- Table A4.14 Chances of having insufficient resources by age and partnership
- Table A4.15 Chances of having insufficient resources by age, gender and partnership
- Table A4.16 Chances of having insufficient resources by age and gender
- Table A4.17 Chances of having insufficient resources by age and health status
- Table A4.18 Chances of having insufficient resources by age and expected mortality
- Table A4.19 Chances of having insufficient resources by age and portfolio status
- Table A4.20 Chances of having insufficient resources by age and portfolio status, has financial assets only
- Table A4.21 Chances of having insufficient resources by age and portfolio status, has financial assets >10k only

#### Chances of receiving inheritance

- Table A4.23 Chances of receiving inheritance by age and ownership housing wealth
  - Table A4.24 Chances of receiving inheritance by age and private pension status
  - Table A4.25 Chances of receiving inheritance by age and ownership of financial assets
  - Table A4.26 Chances of receiving inheritance by age and gender
  - Table A4.27 Chances of receiving inheritance by age and occupational class
  - Table A4.28 Chances of receiving inheritance by age and portfolio status
  - Table A4.29 Chances of receiving inheritance by age and portfolio status, has financial wealth only
  - Table A4.30 Chances of receiving inheritance by age and portfolio status, has financial wealth > 10k only
  - Table A4.31 Chances of receiving inheritance by whether parents are still alive
- 
- Table A4.32 Chances of receiving inheritance >10k by age and ownership housing wealth
  - Table A4.33 Chances of receiving inheritance >10k by age and private pension status
  - Table A4.34 Chances of receiving inheritance >10k, 50-59 year olds by private pension status and labour market status
  - Table A4.35 Chances of receiving inheritance >10k by age and ownership of financial assets
  - Table A4.36 Chances of receiving inheritance >10k by age and gender
  - Table A4.37 Chances of receiving inheritance >10k by age and occupational class
  - Table A4.38 Chances of receiving inheritance >10k by age and portfolio status
  - Table A4.39 Chances of receiving inheritance >10k by age and portfolio status, has financial wealth only
  - Table A4.40 Chances of receiving inheritance >10k by age and portfolio status, has financial wealth > 10k only
  - Table A4.41 Chances of receiving inheritance >10k by whether parents are still alive
- 
- Table A4.42 Chances of receiving inheritance >100k by age and ownership housing wealth
  - Table A4.43 Chances of receiving inheritance >100k by age and private pension status
  - Table A4.44 Chances of receiving inheritance >100k by age and ownership of financial assets
  - Table A4.45 Chances of receiving inheritance >100k by age and gender
  - Table A4.46 Chances of receiving inheritance >100k by age and occupational class
  - Table A4.47 Chances of receiving inheritance >100k by age and portfolio status
  - Table A4.48 Chances of receiving inheritance >100k by age and portfolio status, has financial wealth only
  - Table A4.49 Chances of receiving inheritance >100k by age and portfolio status, has financial wealth > 10k only
  - Table A4.50 Chances of receiving inheritance >100k by whether parents are still alive

**Chances of leaving a bequest**

- Table A4.51 Chances of leaving a bequest by age and ownership housing wealth
- Table A4.52 Chances of leaving a bequest by age and ownership of financial assets
- Table A4.53 Chances of leaving a bequest by age and gender
- Table A4.54 Chances of leaving a bequest by age and occupational class

**Chances of health limiting ability to work**

- Table A4.55 Expectations of health limiting ability to work: Men
- Table A4.56 Expectations of health limiting ability to work: Women

**Retirement**

- Table A4.57 % retired before SPA - Retired only
- Table A4.58 Sample sizes: % retired before SPA - Retired only
- Table A4.59 % retired by occupational class

**Expected labour market participation**

- Table A4.60 Chances of working after age 55/60/65, by age gender and occupational class
- Table A4.61 Chances of working after age 55/60/65, by age gender and whether providing care
- Table A4.62 Chances of working after age 55/60/65, by age gender and portfolio status
- Table A4.63 Chances of working after age 55/60/65, by age gender and portfolio status, has financial wealth only
- Table A4.64 Chances of working after age 55/60/65, by age gender and portfolio status, has financial wealth >10k only
- Table A4.65 Percentage of individuals with self-reported poor health by portfolio status and chances of working after age
- Table A4.66 Chances of working after age 55/60/65, by age gender and occupational class, inactive individuals only
- Table A4.67 Chances of working after age 55/60/65, by age gender and whether providing care, inactive individuals only
- Table A4.68 Chances of working after age 55/60/65, by age gender and portfolio status, inactive individuals only
- Table A4.69 Chances of working after age 55/60/65, by age gender and portfolio status, has financial wealth only, inactive individuals only
- Table A4.70 Chances of working after age 55/60/65, by age gender and portfolio status, has financial wealth >10k only, inactive individuals only

## APPENDIX 4: Additional tables for section 4

Table A4.1 Expected mortality by age and gender

	Expected chances					mean	N
