the Institute for Fiscal

routinely provides the

Support the IFS

IFS is Britain’s leading independent microeconomic research institute.

We have an unrivalled reputation for analysis of the highest quality and for comment of unquestioned independence. That is why we had almost 40,000 recorded mentions in the UK press in 2017 and why our analysis is frequently quoted by all parties in political debate.

Our research is designed to promote good policy, by increasing our understanding of the way in which changes in policy and the economy affect individuals, families, firms and governments. The state of the public finances, the tax system and tax policy, productivity of UK companies and the effect of spending cuts on public services are just a few of the issues on which we are the leading researchers and thinkers.

All organisations will be affected by current and future government economic policies and it is only by understanding the issues and gaining access to key decision-makers that they can contribute to the solutions. Through small round-tables, large conferences and policy briefings, IFS provides a unique forum for the debate and analysis of these topics and for the development and dissemination of policy responses.

As an independent registered charity, we rely on project funding and membership. We simply could not conduct our important research and disseminate our findings without continued and committed financial support from individuals and institutions.

Over 600 delegates from the media, business, civil service, academia and third sector registered to attend our 2017 Green Budget.

During the 2017 General Election campaign, the IFS website was viewed over 275,000 times.

“There’s no-one better to go to on this kind of issue than the IFS. Their independence is beyond doubt as all the main political parties recognise their expertise.”
